DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1,2, 6-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no definition of the linking group L in claim 1 and thus its metes and bounds cannot be determined.

Claims 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no definition of Y in claim 3. Since claim 3 is an independent claim, it must define all of the components of the claimed subject matter.

Claims 12,16 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis in claim 1 or claim 12 for "the acid buffer" recited on line 1 of claim 16.

There is no antecedent basis for a pH range as recited in claim 17 as there is no pH range recited in either claim 1 or claim 12.

Claims 6-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which

Art Unit: 1751

applicant regards as the invention. Claims 6-11 provide for the use of the compound of claim 1, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 6-11 are is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Meininger et al., US 3,663,576. Patentee discloses fiber-reactive anthraquinone dye comprising a phosphonate group attached to a beta-ethylsulfonyl group. Said group is attached to the anilino component of the anthraquinone chromophore. Accordingly, applicant's (a) component, a chromophore, is attached directly via the S atom to the anilino component of the chromophore or by the groups listed in col 1 lines 30-31. See the dye in the abstract; and the process of formation of said dyestuff in column 2. The dyes are used to dye hydroxy and amino containing materials: wool, silk, linear polyamides, leather linen, regenerated cellulose and cotton. See col 4 lines 4-8. Since all of the limitations of the above claims are disclosed, the claims are anticipated.
